

**COMMON FROG
/VANLIG GRODA**

Rana temporaria (LC)
Generalist species

Ecosystem service: Pest control

Source habitat/Reproduction

Small waters/ponds

Moving distance

~500m

Quality biotopes

Ponds, streams, lakes, coniferous forest, open land, wet open land, artificial surfaces, mixed deciduous forest, deciduous forest, grasslands, wet grasslands

Friction

Highly trafficked roads, railways, the ocean

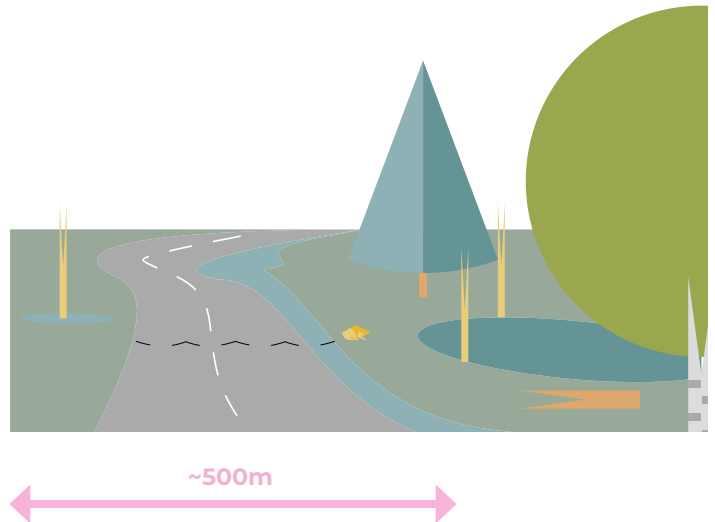

Illustration: Victoria Hansson

LESSER SPOTTED WOODPECKER/ MINDRE HACKSPETT

Dyrobates minor (NT)

Specialist species

Ecosystem service: Bird song,
create other species' nest

Source habitat/Reproduction

Dead or decaying deciduous trees/old
deciduous forests

Moving distance

~400-1500m (seasonal variation)

Quality biotopes

Deciduous forests, pastures, deciduous hardwood forest, mixed deciduous forest, deciduous forest with deciduous hardwood forest, parks/graveyards/big gardens, forest wetlands, open wetlands, spruce forests in winter

Friction

Coniferous forests, open fields/
non-vegetated open land, built
up areas
